

EXPERTS IN RENEWABLE ENERGIES

Site evaluation and project structuring

Licorne Resources

Licorne Resources specialises in the rapidly expanding area of renewable energy. Established equipment manufacturers, construction businesses and even investors are today considered as the largest players dominating this growing and competitive environment. Our clients are thus faced with the challenge of understanding the technical and financial risks as well as tax considerations and legal processes associated with siting and developing renewable projects around the globe.

We partner with our network of multi-disciplinary and highly experienced professionals to advise and guide our clients in the following specialties

[Site evaluation and project structuring](#) | [Project finance](#) | [Consulting advisory services](#)

Site evaluation and project structuring

Our team of experienced partners, covering the largest and renowned construction sites in Europe, Africa and the Middle East, provide market leading solutions and unparalleled service for the evaluation of the construction of sites and related operational matters.

To achieve those objectives, we take into consideration the fundamental elements throughout the project lifecycle - securing the construction site, equipment, procurement, logistics and infrastructure needs for the employees, construction and connections, training of personnel in charge of maintenance and operational matters.

Project finance

Renewable energy is a tide that is getting stronger, and investing into this sector is a long-term investment. The financing of a project, of any nature, takes into account a holistic risk assessment and an analysis of the opportunities in this growing industry.

Our global reach of various renowned and dedicated professionals allow us to provide our clients with a comprehensive and dedicated support in terms of project structuring and financing. Our strong network, ranging from private investors to financial players, enable our clients to expand financing opportunities for their renewable energy projects.

Consulting and advisory services

Our specialists also accompany clients in their respective projects on an ad hoc basis. They provide advisory services to investors who are interested in exploring opportunities in specific renewable energy projects. We pull together consolidated, tailor-made and expert advice about new technologies and equipment that provides our clients with a competitive advantage.
