

RENEWABLES

Greening African communities

In a world that is transitioning to a low carbon future, we are well positioned to understand the challenges, explore solutions and action in the best way to craft sustainable energy solutions for our clients. Our experts collaborate with various partners, including regulatory bodies to stay abreast of industry trends, latest renewable technologies, as well as the applicable regulations.

This enabling us to become your partner of choice for green power and clean energy solutions in Africa. Through a holistic offering of need analysis, solution development, financing, construction and commissioning to success of your renewable energy solutions.

RENEWABLES PROJECTS

Mwenga Hydro Wind Farm

The Mwenga Wind Project provides energy security to a growing rural population and supplying connected communities and businesses sustainably with green power in Southern Tanzania.

POWER & INFRASTRUCTURE

Supporting socio-economic development

In line with our commitment to drive Africa's growth, our Power and Infrastructure solutions remain at the core of our purpose and at the epicentre of our mission to ensure the continent's long-term prosperity and sustainable future.

We have been at the forefront of power and infrastructure projects over the past three decades, helping to electrify Africa. Our deep market knowledge and extensive network of experts enable us to understand the issues and find solutions to energy and infrastructure development challenges and maximise value for our clients.

POWER & INFRASTRUCTURE PROJECTS

Kinyerezi II

The Kinyerezi II power plant project in Ilala district in Dar es Salaam, Tanzania is supplied with natural gas from the Mnazi Bay and adds 240 MW to the country's national grid.

OIL & GAS

Your oil and gas partner for sustainable growth

We have been working with the oil and gas industry for over 25 years, successfully delivering projects in both the up and downstream sectors, involved in engineering new power plants, modifying existing ones, and commissioning infrastructure for all stages of energy production (from processing to refining to distribution). Our working practices follow international and industry standards and allow us to deliver high quality projects in a timely manner.

With deep specialisation in natural resources, we provide our clients cost-effective solutions across the oil and gas value chain to a sustainable future. With novel growth strategies and operational excellence, our in-country experts help you identify opportunities that drive the development of the broader oil and gas ecosystem.

OIL & GAS PROJECTS

Mtwara Port Rehabilitation

The Mtwara port came into existence during the British Colonial period, and it is located in the southern part of Tanzania in the city of Mtwara. A poor transport infrastructure made the Mtwara port underutilized for many years, but during 2010 and 2011, an increased interest in oil, gas, and natural resources caused operations to surge.

MINING

When investing in mining, a whole new world unfolds

Materials from mining activities have been integral to human advancement and essential for maintaining and improving standards of living. Mined materials are all around us, from our phones and cards to our homes and office buildings, used to generate electricity, produce renewable energy, and to provide the many other goods and services that we enjoy in our daily life.

Our competitive advantage lies in our local know-how and experience, our ability to offer a full-service scope, and mining specialists, including the ability to work in remote locations, handle adverse weather conditions, complex and dual lifts, and experience with heavy loads. We are always open to new ideas about the best way to share value from mining projects in a way that preserves and grows investor returns, creates lasting value for host governments and communities and help in the provision of metals the world needs in an environmentally sustainable way.

MINING PROJECTS

Buckreef Goldmine

The Buckreef Project is located in the Geita District of the Geita Region south of Lake Victoria, approximately 110 km southwest of the city of Mwanza, Tanzania. The project comprises five prospects, namely Buckreef, Bingwa, Tembo, Eastern Porphyry and Buziba.

[Read more](#)

North Mara Gold Mine Project

The North Mara gold mine is located in north-west Tanzania in the Tarime district of the Mara region. It is around 100 kilometres east of Lake Victoria and 20 kilometres south of the Kenya border. The mine is a combined open pit and underground operation from two deposits, Gokona (underground) and Nyabirama (open pit).

[Read more](#)

AHAFO GOLDMINE

Located approximately 30 kilometers south of Newmont's existing Ahafo South operations, the Ahafo North Project will comprise a series of open pits and a process plant including crushing, milling, a carbon in leach (CIL) and elution and gold recovery circuits.
